

IVF price list

+ Insured

This price list applies to clients insured with health insurance companies in the Czech Republic.

If a client is entitled to reimbursement from public health insurance, the cycle is billed directly to the health insurance company.

According to Section 15, Paragraph 3 of the Act on Public Health Insurance No. 48/1997 Coll., care related to artificial insemination is covered up to three times in a lifetime, or if in the first two cases only one human embryo was transferred to the woman's reproductive organs, up to four times in a lifetime. Artificial insemination is covered by the health insurance company until the woman reaches 40 years of age. For oncology patients, egg (oocyte) freezing is fully covered once in a lifetime.

Special laboratory methods are paid for directly by the client, as are co-payments for stimulation drugs or medications that exceed the limit covered by public health insurance.

At our clinics it is possible to pay in cash or by card.

IUI - insemination

With Health insurance
reimbursement: **0 Kč**

Without Health insurance
reimbursement: **4 000 Kč**

Price includes:

- ✓ Consultation with IVF specialist
- ✓ Ultrasound examinations during the treatment cycle

Donated eggs

2 blastocyst guarantee, 3rd cycle for free

With Health insurance
reimbursement: **65 000 Kč**

Without Health insurance
reimbursement: **120 000 Kč**

1st payment	<i>Upon the treatment confirmation</i>	30 000 Kč
2nd payment with health insurance reimbursement	<i>No later than on the day of egg fertilization</i>	35 000 Kč
2nd payment without health insurance reimbursement	<i>No later than on the day of egg fertilization</i>	90 000 Kč

Price includes:

- ✓ Consultation with IVF specialist
- ✓ Ultrasound examinations during the treatment cycle
- ✓ STD testing for male partner
- ✓ Cost associated with the donor (Donor screening, donor cycle monitoring and egg retrieval, medication, reimbursement of her expenses related to the donation)
- ✓ Sperm analysis
- ✓ Sperm freezing + 1 year storage
- ✓ ICSI, extended cultivation, assisted hatching (if needed)
- ✓ First embryo transfer
- ✓ Psychological counselling (1 session)

Price does not include.

- × Freezing of embryos and their storage
- × Additional laboratory methods (depending on the recommendation of IVF specialist or embryologist)
- × Medication

In the case of treatment with frozen donor eggs, the egg reservation is valid for 3 months. The reservation can be extended once by 3 months for a fee of **5 000 Kč**.

If, within egg donation cycle the patient did not undergo a fresh embryo transfer, the fee for the first frozen embryo transfer is not charged; the embryo thawing **6 000 Kč** is charged.

If any laboratory methods or services included in the package are not used, patients are not entitled to financial compensation.

Conditions for the 2 blastocyst guarantee:

- The quality of the sperm used for fertilization must not be classified as OAT (oligoasthenoteratozoospermia) or worse according to WHO standards.
- If no blastocyst is created, the patient is entitled to a new cycle with donor eggs free of charge.
- If only 1 blastocyst is created and the patient does not become pregnant (no fetal heartbeat confirmed), an additional embryo will be created asynchronously using eggs from another donor.

Conditions for the 3rd cycle free of charge:

- Completion of 2 cycles with donor eggs
- Use of all embryos created from these two cycles
- No clinical pregnancy (no fetal heartbeat confirmed after the transfer of any embryo created from these cycles)
- Appropriate sperm quality - the quality of the sperm used for fertilization in these two cycles was not classified as OAT (oligoasthenoteratozoospermia) or worse according to WHO standards
- The 3rd cycle free of charge can be used within 12 months of the last embryo transfer
